EXTREME airshow

The Extreme Air Show

This team of World Class skiers and snowboarders brings amazing tricks and death defying feats of Big-Air Winter sports to the public at indoor and outdoor events. Crowds will be captured in amazement as the Extreme Athletes spring from atop the 30 foot high ski jump and fly into the air performing multiple flips, twists, heli/mute grabs and off-axis spins. They land (hopefully on their feet!) on a giant stunt man's air bag landing slope. The exciting show is accompanied by one or two high performance trampoline acrobats performing synchronized tandem and formation jumping. Choreographed with popular music and an MC that keeps the show and crowd revved up, the Extreme Air Show will simply astound your audience of all ages whether they ski and snowboard or not.

HELI / MUTE GRAB

Bio: Dave Valenti - owner, designer and the man who said, "If I build it, they will jump". Dave created the Extreme Air Show from the culmination of his 15 years of competitive Freestyle Aerial Ski Jumping and Acrobatic show performances. His achievements as a World Class competitor, including a World Professional Aerial Title, a National Championship Aerial Title and a Bronze Medal at the Freestyle World Championships. Dave is one of the most exciting

and dynamic acrobatic ski jump performers on the planet and is one of the few jumpers who can perform a double twisting double back somersault on an artificial ski jump. He toured five continents with the Volvo Ski Show acting as production

manager in his final year. Not only is Dave a talented jumper, his professional event organizing and show producing skills will make your event run with ease.

Technical Requirements:

45ft diameter round area with a 10ft x 50ft leg from the jump. Please ask for specifications. Show provides 600 watt Sound System. Requires 110 power at least 1750 watts, one or two cordless microphones.
